

Photovoltaic panel removal construction market price

Overview

The average homeowner spends between \$1,200, with costs ranging from \$1,000 to \$3,500 depending on the number of panels, roof complexity, and labor rates. Expect to pay \$200–\$500 per panel for removal, with additional fees for repairs or disposal. Some contractors may also charge a base fee, often around \$500, or have a minimum project cost of about. Not only are the dangers of environmental issues real and present, but decommissioning comes with a price tag—and not a small one. Depending on your array's size and location, decommissioning your panels can cost thousands or even tens of thousands of dollars. Several factors determine whether you'll pay closer to \$3,000 or find yourself writing a check for \$15,000 or more. This work has grown to include cost models for solar-plus-storage systems. NLR's PV cost benchmarking work uses a bottom-up.
