

# Photovoltaic panel supporting sector analysis report

## Overview

---

For the 29th consecutive year, the IEA-PVPS Trends report is now available. The US solar industry installed 11.7 gigawatts direct current (GWdc) of capacity in Q3 2025, a 20% increase from Q3 2024, a 49% increase from Q2 2025, and the third largest quarter for deployment in the industry's history. Following a low second quarter, the industry is ramping up as the end of the year approaches. The global solar PV panels market size was estimated at USD 170.25 billion in 2023 and is projected to reach USD 287.5 billion in 2025. This document provides the most comprehensive global overview of the development of the Photovoltaics sector, covering policies, drivers, technologies, statistics and industry analysis.

- China continued to dominate the global market, representing ~60% of 2024 installs, up 52% y/y.
- The IEA reported Pakistan's rapid rise to fourth place in annual global PV.

The IEA examines the full spectrum of energy issues including oil, gas and coal supply and demand, renewable energy technologies, electricity markets, energy efficiency, access to energy, demand side management and much more. Through its work, the IEA advocates policies that will enhance the global energy system. Each quarter, the National Renewable Energy Laboratory conducts the Quarterly Solar Industry Update, a presentation of technical trends within the solar industry. Each presentation focuses on global and U.S. supply and demand, module and system price, investment trends and business models, and.

## Photovoltaic panel supporting sector analysis report

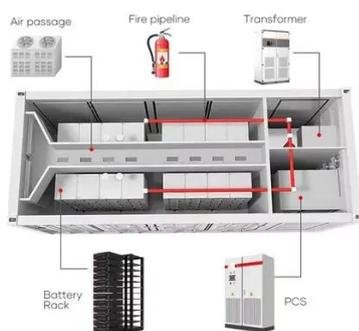

### [Executive summary - Solar PV Global Supply Chains - Analysis](#)

Today, China's share in all the manufacturing stages of solar panels (such as polysilicon, ingots, wafers, cells and modules) exceeds 80%. This is more than double China's share of global PV demand. In ...

### Trends in PV Applications 2024

For the 29th consecutive year, the IEA-PVPS Trends report is now available. This document provides the most comprehensive global overview of the development of the Photovoltaics sector, covering ...

### [Solar PV Panels Market Size, Share & Trends Report, 2030](#)

Growing demand for renewables-based clean electricity coupled with government policies, tax rebates, and incentives to install solar panels is expected to drive the growth of solar PV panels industry in ...

### Quarterly Solar Industry Update

Each quarter, the National Renewable Energy Laboratory conducts the Quarterly Solar Industry Update, a presentation of technical trends within the solar industry.

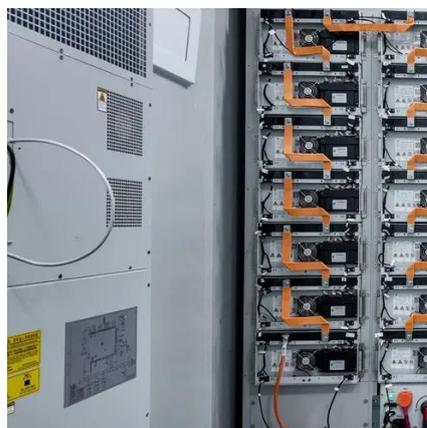

## Solar Market Insight Report Q4 2025

Photovoltaic (PV) solar accounted for 58% of all new electricity-generating capacity additions through the third quarter of 2025, remaining the dominant form of new electricity-generating ...

### [Solar Energy Market Size, Forecast, Share & Report Analysis 2031](#)

Corporate power-purchase agreements (PPAs) from data-center operators, the growing pipeline of photovoltaic-battery hybrids, and accelerated policy support in land-constrained countries ...

### [Solar Market Insight Report 2024 Year in Review](#)

The industry continued breaking records and experiencing unprecedented growth, accounting for 66% of all new generating capacity added in 2024. All solar segments set annual installation records except ...

## Spring 2025 Solar Industry Update

- The residential PV sector decreased overall growth, contracting 31% due to California's transition to NEM 3.0 and sustained high interest rates across the nation.

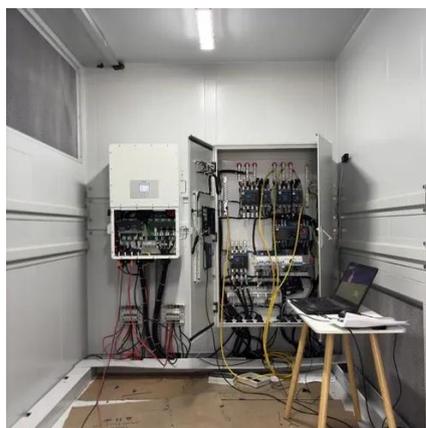

### [Special Report on Solar PV Global Supply Chains](#)

Solar PV is a crucial pillar of clean energy transitions worldwide, underpinning efforts to reach international energy and climate goals. Over the last decade, the amount of solar PV deployed ...

### [Solar Photovoltaic Market Size, 2025-2034 Trends Report](#)

The Asia Pacific solar PV market is projected to grow at a CAGR of more than 9.3% from 2025 to 2034, driven by strong policy support, falling technology costs, rapid advancements in energy storage ...
