

Photovoltaic panels installed on aluminum tile roof

Overview

DIY solar energy system installation on tile roofs is strongly discouraged and often legally restricted. Homeowners typically need government permission, and the installation should be performed by trained professionals to avoid damage, warranty voidance, and missed incentives. With the right equipment, proper planning, and professional installation, your tile roof can easily support a robust solar energy system. So, can you install solar panels on a tile roof?

The short answer is yes—but it requires careful planning and the right installation technique to ensure your roof remains intact and your solar system lasts for decades. Professional installation is crucial in navigating these challenges, such as ensuring proper weight distribution and addressing tile brittleness. This guide is for solar professionals.
