

Photovoltaic panels installed on iron roof

Overview

Here's what you need to know about installing solar panels on a metal roof. Solar panels can increase. Greentech Renewables has organized crucial insights to help solar installers understand the most cost-effective and safest options when working on metal roof solar installations. Why trust EnergySage?

Metal roofs are light, durable, and often made of eco-friendly recycled materials. While asphalt roofs often only last 12-30 years, metal roofs easily. Metal roofs are an excellent choice for solar panel installation. Standing seam metal roofs allow for clamp-on mounting systems with no roof penetration, while corrugated and trapezoidal profiles require direct attachment to the roof structure. They're like the dynamic duo of home efficiency, ready to tackle your energy bills and the planet's health in one fell swoop.
