

# Self-use solar power generation has subsidies

## Overview

---

Personal-use solar power systems are eligible for a federal income tax credit under Sec. This credit is available only for the taxpayer's personal residence and equals up to 30% of the costs of qualified property installed. The CPUC's Self-Generation Incentive Program (SGIP) offers rebates for installing energy storage technology at both residential and non-residential facilities. Depending on the battery and how much. Tax benefits are available to taxpayers who generate their own electricity from solar power generation systems whether the system is for personal or business use. These financial incentives—think tax credits, grants, and rebates—are all about making it easier for you to install solar panels, which can help you save on those. The most common solar tax incentive is called the Investment Tax Credit (ITC). The biggest hurdle for many households is the upfront cost.

## Self-use solar power generation has subsidies
