

Selling energy storage discharge to power companies

Overview

The short answer is yes, individuals can sell surplus solar electricity back to electric companies. This is commonly facilitated through net metering programs, where the utility company credits the solar producer for the excess energy supplied to the grid. Most homeowners see \$600-1,500 in annual bill reductions rather than income payments. Location dramatically impacts profitability - With 34 states plus D. Unless you are planning. Energy storage is critical for mitigating the variability of wind and solar resources and positioning them to serve as baseload generation. What is Net Metering?

Net metering is a billing.
