

Should photovoltaic panels be installed on the roof or on the ground

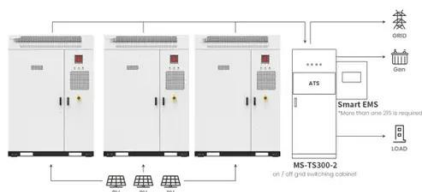

Overview

Ground-mounted solar systems are best for homes with roofs unsuitable for solar panels. The most obvious difference between ground-mounted and roof-mounted solar panels is the installation location. Each option has unique advantages, drawbacks, and costs that can impact your energy production, budget, and maintenance needs for decades to come. These panels are typically mounted on racks that hold them at the right angle to capture sunlight. Solar panels work well when they're installed either on the roof or on the ground, but each of those arrangements comes with its own share of pros and cons.
