

Solar Power Generation Grid Connection Forum

Solar Power Generation Grid Connection Forum

Solar panels and generator connection

"The bottom line is you cannot allow solar panels and a generator to work in parallel. They must be electrically isolated at all times. If solar inverters "see" voltage from a generator, they ...

[First major project with questions about grid connection](#)

I've done a bit of small hobby solar (shed install, experiments, etc) but now I'm seriously looking at a project for my residential house to supplement and theoretically replace grid power.

[Newbie: connecting solar system to grid : r/SolarDIY](#)

I use a Sol-Ark inverter that connects to my main panel and zeros out my meter, meaning I have grid power when needed, but the inverter prioritizes solar and batteries over grid power.

Solar DIY

I find it very difficult to find information by searching Google when it comes to solar power, and I am starting to wonder if that is on purpose. So I am here to ask this community instead.

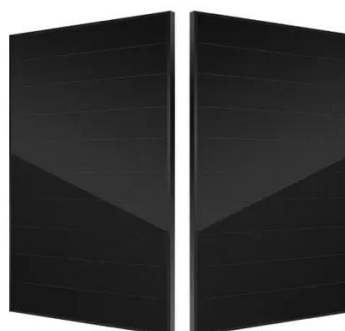

[Grid-Tied Solar Panels & Backup Generator Electrical Hookup](#)

I intend to install a 22kW Generac Generator with a whole-house transfer switch (i.e. it covers everything in the breaker panel). I'm having a hard time figuring out how to diagram this ...

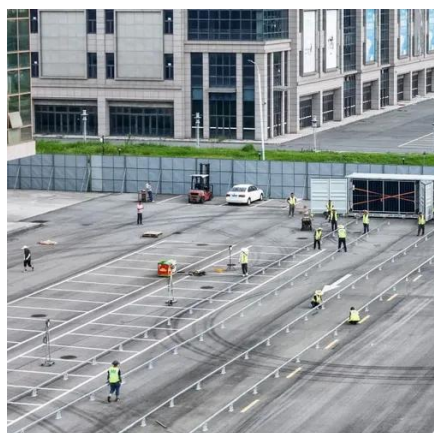

Grid-Connected Renewable Energy Systems

While renewable energy systems are capable of powering houses and small businesses without any connection to the electricity grid, many people prefer the advantages that grid-connection offers. A ...

[Off Grid solar and generator connecting the system](#)

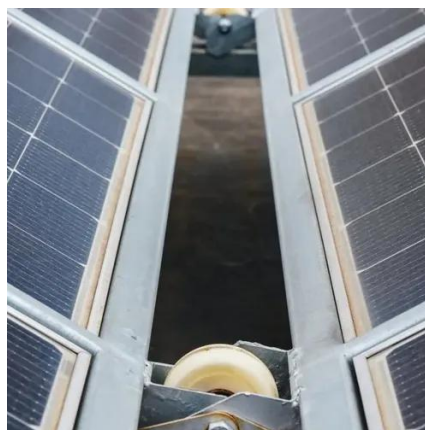

If I'm understanding you correctly, you're wanting to isolate the generator and solar system from one another, ie. never both at the same time? If that's the case, I'd use a double throw ...

The Right Way to Ground

All the wiring I've been doing for the last couple weeks has just based on manuals and common sense. But the whole Ground situation is beyond me, and all the information I can find is ...
