

Solar battery cabinet cabinet is hot and smells

Overview

If you notice smoke, unusual smells, or signs that your battery system is on fire, evacuate the area immediately. Leave the building and ensure that everyone in your household or. One of the most common fire hazards in a solar battery cabinet is overheating. Batteries generate heat during charging and discharging cycles. If the cabinet doesn't have proper ventilation, this heat can build up. Its likely being overcharged, either because your controller is bad, or the battery has a dead cell that won't take a charge, and your controller is trying to charge it, which is boiling the other good cells. to check whether any feel warm or hot. Besides a loose connection, oxidized or slightly dirty contacts, or incorrect terminal hardware stacking (e.
