

# Solar cabinet system keeps switching

## Overview

---

If your inverter is repeatedly tripping or if the circuit breaker associated with your solar system keeps shutting off, there could be a fault in the wiring or an overload issue. Consult a professional to investigate and resolve the problem safely. These sophisticated devices play a crucial role in converting the direct current (DC) electricity generated by solar panels into alternating current (AC) power usable by your home. New to solar?

Learn how solar works. Before we get into too much detail you will need a. Whether it's too many appliances drawing power, a frayed wire hiding behind the wall, or an inverter acting up, the circuit breaker steps in to cut things off before they escalate. Identifying these issues early helps restore your energy production quickly.
