

Solar panels were installed yesterday

Overview

Call your installer to find out that status. Did you receive a Welcome email from Enphase yet signifying the completion of the install?

Or, do you not see any solar panel-micro pairs in your Enlighten "Array" screen or Enlighten Manager (enlighten. Doesn't that seem extremely long?

: r/solar Discussion of solar photovoltaic systems, modules, the solar energy business, solar power production, utility-scale, commercial. Secondly, after your panels and bi-directional meter are installed, you will need to receive a permission to operate (PTO) from your utility company. This usually doesn't require any work on your end as your solar company should. Let's delve into what you can expect after getting your solar panels installed! What Happens After Installation?

Once the installation is complete, you're almost done! There are two final steps that need to be completed before switching the panels on. Is this what I should be seeing right now?

It looks like my panels are charging the PW, but the percentage is staying at 0.

Solar panels were installed yesterday

[What Happens After Solar Panels Are Installed?](#)

Learn about what happens after your solar panels are installed, and what steps to take to keep them functioning at their best.

We just had our solar panels installed but the electric company has ...

Ask your installer or look at your meter. Wait for the inspection approvals to turn the system on, if that is what you are really asking here.

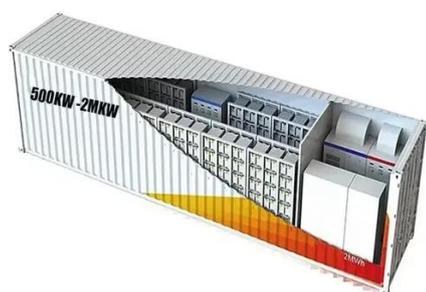

Just Installed Solar? Here's What to Do Next , Camrose Energy' Solar ...

Your solar panels are installed - now what? Learn how to maximize your solar savings, switch to The Solar Club(TM), and get the best rate for your energy production.

What to Expect After Installation

After installation, you will be contacted to go through a final building inspection. Once inspection is complete, we will need to receive permission to operate (PTO) from your utility. Track your order in ...

My Solar is Installed Now What?

Unfortunately, you won't be able to start producing renewable energy immediately after the installation is complete. There's at least one, but potentially two things that need to happen first. Firstly, your home ...

[Solar was installed yesterday. Should I be concerned ...](#)

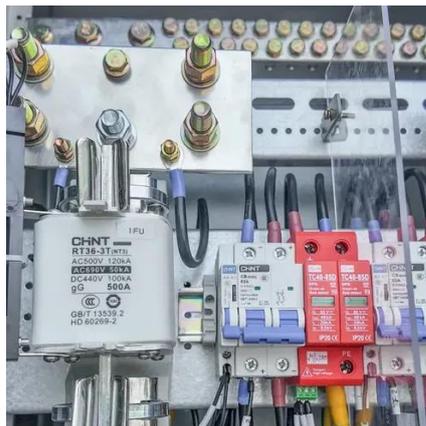

I have just had solar panels fitted lots of smudges and light scratches. The company have said the installers will return next week and replace the scratched panels.

[Solar was installed yesterday. Our installer is saying to expect 4](#)

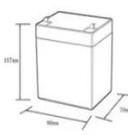

We install in pge territory and typically pto is received within 7-10 days after we submit signed off permit card to utility.

[Just installed yesterday, waiting for SCE to install backup](#)

A place to discuss Tesla Solar Panels, Solar Roof, Power Wall, and related gear. If you're into solar energy, tesla, or cool technology, this is the place for you!

12.8V6Ah

- Nominal voltage (V):12.8
- Nominal capacity (ah):6
- Rated energy (WH):76.8
- Maximum charging voltage (V):14.6
- Maximum charging current (a):6
- Floating charge voltage (V):13.6~13.8
- Maximum continuous discharge current (a):10
- Maximum peak discharge current @10 seconds (a):20
- Maximum load power (W):100
- Discharge cut-off voltage (V):10.8
- Charging temperature (°C):-20~+50
- Discharge temperature (°C):-20~+60
- Working humidity: <95% R.H (non condensing)
- Number of cycles (25 °C, 0.5c, 100%dod): >2000
- Cell combination mode: 32700-4s1p
- Terminal specification: T2 (6.3mm)
- Protection grade: IP65
- Overall dimension (mm):90*70*107mm
- Reference weight (kg):0.7
- Certification: un38.3/msds
