

# Solar photovoltaic panels in industrial areas

## Overview

---

Industrial solar panels are specifically designed to meet the unique energy demands of large-scale industrial operations. Leverage the flat roofs of factories to generate additional power for electricity-intensive machinery or HVAC systems. SolarEdge's energy ecosystem is designed to maximize energy cost savings, seamlessly integrating PV, EV charging and storage solutions, promoting safety in combustible. Industrial solar panels offer a compelling way for businesses to harness the power of the sun and reduce their reliance on traditional energy sources. Solar PV systems can be installed on roofs, facades, carports, or on the ground. They are durable and efficient, making them perfect for factories.
