

Solar photovoltaic panels payback

Overview

For the average solar shopper, that translates to around \$61,093 in savings over 25 years. Your payback period depends on your electricity costs, system size, and how you pay for solar. However, in some states, the payback period can be as short as five years or as long as 15. Understanding what drives those differences. A solar payback calculator answers the most important financial question homeowners have: How long until solar pays for itself?

In an era of rising electricity prices, guessing is expensive. Use our free calculator at the top of this page to get your exact numbers.
