

Stockholm battery recycling

Overview

The facility recovers battery-grade metals with a carbon footprint 70% lower than mined raw materials, thereby enabling a fully integrated, circular battery production setup that has not previously existed outside of Asia. Much of the material in batteries can be recycled, but they also contain substances that are hazardous to both the environment and human health - and that must be.

Northvolt AB is committed to sustainability in battery production, aiming to create the world's greenest lithium-ion batteries. By learning what's. Scandinavian battery company works with global engineering firm ABB on electrification of its Revolt recycling facility. Battery producer Northvolt is designing its Revolt facility to process 125,000 tons of end-of-life lithium-ion batteries and battery production scrap annually. Therefore, we want to explain how we handle battery recycling and the management of battery waste collected through our collection system.

Batteries contain heavy metals like lead, mercury, cadmium, and nickel, which can leach into soil and.

Application scenarios of energy storage battery products

[Top 60 Battery Recycling Companies in Sweden \(2026\) , ensun](#)

The battery recycling industry in Sweden is influenced by several key considerations. Sweden is known for its strong environmental regulations, which mandate proper disposal and recycling of batteries to ...

[Stena Recycling's new battery plant , Stena Recycling](#)

Today Stena Recycling inaugurated its first industrial recycling facility for lithium-ion batteries, an investment of a quarter of a billion SEK. It is situated in south of Sweden and one of the ...

[Reduce, recycle, reuse - making batteries in Sweden](#)

Besides its excellent record of recycling, the battery production plant itself has an impressive set of eco-credentials. According to Richard, direct emissions are virtually zero and it ...

Battery recycling & disposal

You can learn more about battery recycling and identify a battery collection point near you that'll accept your used portable batteries at no charge. Please do not return your used

[Northvolt raises \\$5 billion for circular gigafactory](#)

Northvolt was established in 2016 in Stockholm, Sweden. Pioneering a sustainable model for battery manufacturing, the company has received \$55 billion in orders from key customers, ...

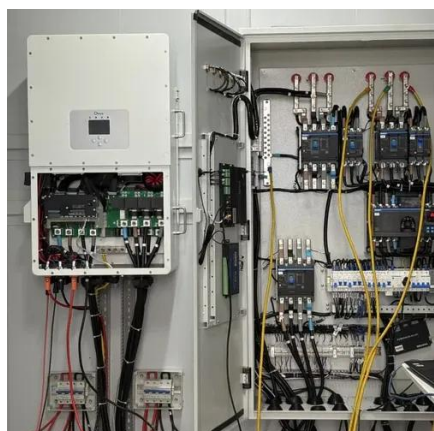

[Swedish battery recycling plant leads the way](#)

Stena Recycling Group has completed construction of its first recycling facility for lithium-ion batteries, claimed to be one of the first at industry scale in Europe.

How We Recycle Batteries

Much of the material in batteries can be recycled, but they also contain substances that are hazardous to both the environment and human health - and that must be handled in specific ways. The material ...

Better Cities

From a TV remote to your kid's favourite toy, batteries power our world, and recycling them is a small act that makes a massive difference. We're proud to support a greener future by making battery ...

[Northvolt invests in Swedish recycling location](#)

Switzerland-based global engineering and automation firm ABB Group has been commissioned to deliver "electrification solutions" to Revolt Ett, an under-construction battery ...

Battery Recycling

When we collect batteries and other electrical waste, they are sent to our recycling stations. One of the first steps there is a sorting process, during which all hazardous waste is separated. Since batteries ...
