

# The latest user-side energy storage prices

## Overview

---

Around the beginning of this year, BloombergNEF (BNEF) released its annual Battery Storage System Cost Survey, which found that global average turnkey energy storage system prices had fallen 40% from 2023 numbers to US\$165/kWh in 2024. Energy storage prices saw slight declines in late 2024, but a new wave of tariffs and trade rulings is likely to reshape pricing in the months ahead. The suite of publications demonstrates wide variation in projected cost reductions for battery storage over time. Figure ES-1 shows the suite of projected cost reductions (on a normalized. Battery energy storage costs have reached a historic turning point, with new research from clean energy think tank Ember revealing that storing electricity now costs just \$65 per megawatt-hour (MWh) in global markets outside China and the United States. This article explores the definition and. According to the latest CNESA DataLink statistics, user-side energy storage installations in September recorded year-on-year growth but a month-on-month decline.

## The latest user-side energy storage prices

---

### [User-Side Energy Storage Price Trends: What You Need to Know in ...](#)

Whether you're eyeing a 10MWh project or a gigawatt-scale beast, 2025's prices are a moving target. Stay sharp, watch the lithium market, and maybe--just maybe--build your own ...

### [User-Side Energy Storage Projects Double in August: Insights and ...](#)

With the current electricity pricing policy, user-side energy storage can achieve around 600 charge and discharge cycles annually, indicating substantial potential for "price arbitrage," which may ...

### **SOLAR AND STORAGE MARKETPLACE REPORT**

Price dispersion for EnergySage customers For the first time, the average highest quoted price per watt dropped below \$3.00 in H2 2024.

### [Energy storage prices in Q1 face market stabilization and tariff](#)

A new Q1 2025 report from Anza, a subscription-based data and analytics software platform, analyzes list-price trends and key factors shaping pricing for energy storage systems.

### [Cost Projections for Utility-Scale Battery Storage: 2025 Update](#)

The projections are developed from an analysis of recent publications that include utility-scale storage costs. The suite of publications demonstrates wide variation in projected cost reductions for battery ...

### [BNEF finds 40% year-on-year drop in BESS costs](#)

Around the beginning of this year, BloombergNEF (BNEF) released its annual Battery Storage System Cost Survey, which found that global average turnkey energy storage system prices ...

### [Energy Storage Cost and Performance Database](#)

In support of this challenge, PNNL is applying its rich history of battery research and development to provide DOE and industry with a guide to current energy storage costs and performance metrics for ...

### [Ember Report Reveals Utility-Scale Battery Storage Now Costs Just ...](#)

Battery energy storage costs have reached a historic turning point, with new research from clean energy think tank Ember revealing that storing electricity now costs just \$65 per megawatt ...

### [Energy Storage Costs: Trends and Projections](#)

This discussion aims to elucidate the implications of evolving energy storage costs and their impact on the energy landscape through an energy systems approach.

### [User-side Energy Storage Installation Declines Month-on-Month, ...](#)

According to the latest CNESA DataLink statistics, user-side energy storage installations in September recorded year-on-year growth but a month-on-month decline.
