

# The photovoltaic panels have paid for themselves

## Overview

---

For the vast majority of homeowners with properly sized systems, yes—not only do solar panels pay for themselves, but they usually generate tens of thousands of dollars in profit over the system's 25+ year lifespan. However, in some states, the payback period can be as short as five years or as long as 15. In this guide, we'll help you calculate your solar panel payback. Adding solar panels to your home is the rare home improvement project that pays for itself. 1 On average, residential solar installations in the U. pay for themselves within 7 to 10 years, although this varies. Determining your potential savings can be difficult to conceptualize and calculate if you've never installed solar before.
