

The rooftop solar panels were damaged by the typhoon

Overview

TAIPEI (Taiwan News) — The Ministry of Economic Affairs said Wednesday that Typhoon Danas damaged approximately 145,000 solar panels in Chiayi and Tainan, with a total weight of about 2,800 tonnes. In Chiayi, roughly 114,000 panels were damaged, totaling about 2,200 tonnes. Additionally, the disaster resulted in damage to renewable power infrastructure, including rooftop solar systems and solar photovoltaic plants. Following the devastation wrought by Typhoon Yagi in Hainan, the Leizhou Peninsula, Vietnam and Myanmar, Typhoon Bebinca made landfall in Shanghai on the. The team observed systems with no apparent damage, as well as systems that were completely lost. Systems fared very well overall. Solar energy is a great way to save money, which also helps lower planet-heating pollution.
