Overview

The ESW therefore assesses the key challenges facing the sub-sector and provides information, analysis and recommendations regarding: 1) the overall energy policy and strategy framework; 2) the institutional and regulatory framework including the necessary reforms within the context. The ESW therefore assesses the key challenges facing the sub-sector and provides information, analysis and recommendations regarding: 1) the overall energy policy and strategy framework; 2) the institutional and regulatory framework including the necessary reforms within the context. The main objective of this sector work (ESW) is to provide the World Bank and the Government of Togo with a sound basis and proposals for decision-making about the main electricity sub-sector issues facing the country. The ESW therefore assesses the key challenges facing the sub-sector and provides. Togo has a low rate of electricity access, with great disparity between urban and rural areas. Approximately 52% of Togolese have access to electricity. It borders Burkina Faso to the north, Benin to the east, Ghana to the west and the Atlantic Ocean to the south. The progress made and the favourable outlook should help to achieve universal access to. In a context where Sub-Saharan Africa accounts for over 80% of the world's population without access to electricity, Togo is asserting its energy leadership by unveiling the “Mission 300” initiative during a strategic meeting in London.
