

What are the Longganhu solar brackets

Overview

These brackets serve as the mechanical interface between the solar panel frames—typically made of aluminum—and the underlying support structure such as rails, trusses, or purlins. Solar panel installation constitutes a substantial project with significant financial implications, entailing numerous subsequent decisions. Whether a stationary fastener or a part with free-moving components, our cross-industry professional designers are able to bring you new methods. New parts will reduce weight and speed up the work of assembly. Standards are norms or requirements that establish a basis for the common understanding and judgment of materials, which is no less than 10% smaller than the estimates.
