

What are the specifications and dimensions of single crystal 550 solar panels

Overview

The Jinko 550w solar panel with 2278×1134×35mm (89.38 inch) dimensions, is a first-rate monocrystalline solar panel made out of the highest-grade silicon. 29% efficiency, making it perfect for domestic and commercial on/off-grid solar installations. Meticulous manufacturing, testing and quality assurance standards, certified raw materials and in-house developed MES system ensures consistent traceable quality. IEC 61215 IEC 61730 UL 61730 CE The IEC prescribed test with 25mm hail stones. (Speed of 23m/s) to 30th year. ★ Solar panels are designed for industrial and professional applications using scratch resistant anodized aluminum with. ★ The long-lasting 550W. With its impressive capacity, the 550-Watt Solar Panel showcases the remarkable efficiency and productivity of modern solar technology. This solar panel is equipped with exceptionally efficient (PERC) monocrystalline silicon solar cells, providing both cost savings and better power output performance. Engineered with industry-leading technologies, this high-powered 550 watt solar panel provides maximum power generation for your limited roof space.
