

# What to do if the snow melts on the photovoltaic panel surface

## Overview

---

When the snow melts or slides off of the panels, it also cleans them. Still, if the snow isn't sliding away on its own, you need to remove it to keep things running smoothly. That being said, handling panels carefully during maintenance is crucial to avoid voiding warranties or insurance coverage. Additionally, we address common concerns. Fortunately, you can limit the impact snow, and other winter precipitation has on your solar performance and still get the most return on your investment.
