

Why can't the community install photovoltaic panels

Warranty
10 years

LiFePO₄

Intelligent BMS

Wide Temp:
-20°C to 55°C

Overview

Installation of solar panels is often restricted due to various regulations, including zoning ordinances, safety concerns, and aesthetic considerations, significant homeowner association guidelines, and regional variances in energy policies. Department of Energy defines community solar as any solar project or purchasing program, within a geographic area, in which the benefits flow to multiple customers such as individuals, businesses, nonprofits, and other groups. I see it as a practical step toward expanding clean energy use beyond individual rooftop systems. What Is Community Solar?

Community solar involves a shared solar array that multiple participants subscribe. The challenges surrounding the installation of solar photovoltaic systems primarily stem from high initial investment costs. Most states have solar access laws that forbid any agreement, covenant, condition, bylaw, or contract that outlaws or limits solar installations by Homeowners Associations (HOA) or other municipal bodies.
