

Yang Xiaoyang installs photovoltaic panels

Overview

The quick summary: China installed a record-breaking 93 GW of solar capacity in May alone, producing almost 100 panels per second and demonstrating how renewable energy can scale rapidly to meet global climate goals. This image shows an integrated offshore wind and solar energy project that combines wind turbines with photovoltaic arrays at sea. What's new?

Welcome to the Global Solar Atlas. Start exploring solar potential by clicking on the map. Calculate energy production for selected sites. - showing the company's contact details and offerings.
